## Steam cleaning all living areas

Stubborn soil that resists traditional hot water, cleaning solutions and vigorous scrubbing can often be effectively removed with high temperature steam. Baked-on grease on the stovetop, dried fruit juice in the refrigerator, stubborn soap scum on sliding shower doors, gum on countertops — steam makes all these far easier to clean. Use your Steam Shot™ to soften and remove stubborn dirt, grime, dry, hardened food, and other household soil from hard surfaces. You can also use your steam cleaner to clean pet cages.

**NOTE: Always remove pets before cleaning.**

1. Fill with cool tap water or distilled/demineralized water.
2. Connect the plug to an appropriate outlet.
3. When red indicator light turns off, the steamer is ready to use. Press trigger to release steam.
4. Wipe surface with a clean, dry cloth.

In order to refill the water tank after emptied, the trigger must be engaged to release all the steam/pressure that may be built up. Press the trigger to release all the steam/pressure.

## Steaming/freshening clothes

Use your Steam Shot™ to remove wrinkles from clothes, and “freshen” clothing that has been stored. Test for color fastness in a hidden area. If color is affected do not use.

1. Hang clothing from a shower rod or clothes hook using a sturdy clothes hanger.
2. Fill with cool tap water or distilled/demineralized water.
3. Connect plug to an appropriate outlet.
4. Attach the fabric steamer tool with pad attached.
5. Press trigger to release steam.
6. Move over fabric taking care not to concentrate steam in a single area.

## WARNING

Keep face and all exposed skin away from steam. Failure to do so may result in personal injury.

## WARNING

Thermal shock can shatter glass. Before cleaning cold glass surface, carefully warm the surface by directing the steam jet on the glass from a distance of no less than 4 - 6”.

## Tip

**Your Steam Shot™ is a very versatile tool.**

**Use it to:**

- » Give your houseplants a refreshing cool cloud mist by using at 12” or more away from plants.
- » Soften gum or adhesives for easier removal.
- » Soften glazing putty on windows for easier removal.
- » Clean grills.
- » Clean coolers.
- » Clean sink garbage disposals.
- » Clean exhaust fan reusable filters (always remove from fixture before cleaning).
